Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This is the second Office Action **final** for serial number 10/534,871, Container Suspending Device, filed on May 12, 2005.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-10, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,320,216 to Pangborn.

Pangborn '216 discloses a container suspending device (110 - figures 6-7) comprising: a container suspending base plate (116) fabricated by pulp molding (cardboard-like) having a plurality of circular openings (18), and a plurality of lock pieces (22) extending inwardly from an inner peripheral edge of each of the circular openings, diameters of the circular openings being formed so that head parts of containers to be suspended can pass therethrough, and diameters of virtual circles formed by ~~connecting tips of the plurality of lock pieces to each other being formed smaller than~~ diameters of lock parts formed on peripheries around the head parts of the containers; and a top plate (112) bonded on an upper side of the container suspending base plate (116), in which square cap-shaped fitting parts (see figure 7) to cover the head parts of the containers to be suspended are formed. Accordingly, it would have been obvious

Art Unit: 3632

to one of ordinary skill in the art at the time the invention was made to have modified the shape of the fitting parts to be of various shapes including cap-shaped (circular) fitting parts since it has been held that a change in shape of a prior art device is a design consideration within the skill of art. *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

Claims 11-13, and 15-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,320,216 to Pangborn in view of U.S. Patent No. 3,046,711 to Harrison.

Pangborn '216 discloses the previous invention failing to teach wherein the container suspending base plate and the top plate are included with water-resistant finish. Nevertheless, Harrison '711 discloses wherein the container suspending device formed of carton board including a water-proof film. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the material of Pangborn '216 to include a water-proof film as taught by Harrison '711 wherein doing so would provide thereof a protection from contamination of the container.

Response to Arguments

Applicant's arguments filed January 19, 2007 have been fully considered but they are moot in view of the new ground(s) of rejection.

Art Unit: 3632

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

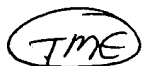

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
